## WHO WE ARE?

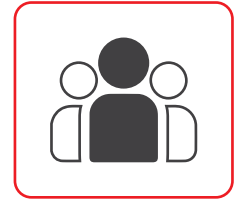

The RedTeam team is made up of seasoned security professionals with over 30 years combined experience in applied InfoSec consulting. We've played pivotal roles in securing critical information systems across the public and private sectors. But what's more is that we're a part of the global InfoSec community, building and maintaining open source security tools, training tomorrow's cyber-warriors, and helping mitigate vulnerabilities in commercial and proprietary systems. We back up our technical and analytical skills with our ability to distill and communicate technical security concepts into concrete and actionable business security advice.

# SERVICES

---

# PRODUCTS

**mimecast**

Mimecast's security, archiving and continuity cloud services protect business email and deliver comprehensive email risk management in one fully-integrated subscription service. Mimecast reduces the risk, complexity and cost traditionally associated with protecting email. You no longer need to manage an array of disjointed point solutions from multiple vendors

**BIT SIGHT**  
The Standard in SECURITY RATINGS

BitSight Security Ratings are a measurement of any organization's security performance. Much like credit ratings, BitSight Security Ratings are generated through the analysis of externally observable data. It provides an independent, objective view of a company's security posture

**GROUND LABS**

Criminals steal sensitive data for a living. Don't let your company be the next victim of a data breach. More than 2,500 companies use Ground Labs software to make sure there is no sensitive data hiding in unsafe locations such as documents, emails and databases. It's an important part of PCI DSS compliance and helps you sleep better at night when there is no data to steal

**goanywhere**  
by HelioSystems

GoAnywhere Managed File Transfer (GAMFT) is an enterprise-level solution that secures, automates and streamlines file transfers for organizations of all sizes. GAMFT is deployable on-premises, cloud or hybrid environments, this managed file transfer solution helps organizations to achieve regulatory compliance with ease, improve data security and streamline manual processes. GAMFT will provide a safe, audited method for automatically transferring information within and outside of your enterprise
